Hotel

The **SkyNet 1000** automation system ensures a warm welcome upon your guest's entry and energy savings when your guest leaves a room. It is also perfect for Hotel Management both saving of energy usage and better customer experience.

Conference room

Make the space more functional by adjusting both natural and electric light to set just the right light.

High-end retail

Call attention to merchandise by creating a dynamic and dramatic shopping experience.

Museum

Display artwork in its best light. Protect art from harmful UV rays by using shades.

Residential

Stylish design plus intelligent control which fits for highend residential user.

SkyNet 1000-MS Management software

It is well configured, user friendly environmental controls can help improving guest satisfaction, add a bit of a "wow" factor and dramatically reduce energy consumption.

With energy savings and an enhanced customer experience as the goal, it is important to find the right balance between the two and to find the correct level of control for the budget.

SkyNet1000 is an advanced networked system which allows total lighting control for the entire building on a single continuous system. Guest rooms, common areas, corridors, conference rooms, banquet rooms, site lighting & signage are all part of the same system. These are monitored, controlled or adjusted easily by any authorized user from any computer, using our SkyNet1000-MS graphical software.
